

FOR IMMEDIATE RELEASE

Expanded Product Line for Expanding Home Experiences
*KANDY Outdoor Flooring Announces **KANDY Grass** for Canada's Condos*

Tuesday May 3, 2016 – Toronto/Vancouver: Canadians living in condos now have even greater product options with KANDY Outdoor Flooring's introduction of KANDY Grass interlocking deck tiles.

"We're excited to announce the addition of synthetic grass outdoor flooring for condo balconies, ground patios and rooftop terraces," says Kelly Niessen, Chief Experience Officer and co-founder of KANDY Outdoor Flooring. "We already offered the largest selection of the highest quality outdoor flooring, and KANDY Grass provides even more variety in design options at a lower price point than our premium exotic hardwoods."

KANDY Grass is designed specially and specifically for condos, with its interlocking drainage base allowing water to drain freely and wash away underneath. It is also a perfect match for our Canadian climate: frost and heat resistant, UV stabilized, with environmentally friendly synthetic grass blades that look and feel like a real manicured lawn.

"Our *KANDY Grass* product line really allows us to deliver on our unique value proposition of *service, quality, and choice*," Niessen says, "And it really makes everyone here at KANDY Outdoor Flooring very proud to be Canadian."

KANDY Outdoor Flooring expands home experiences with service, quality and choice in new outdoor flooring for condo balconies, ground patios and rooftops. KANDY has active franchise partners in Greater Vancouver, Edmonton, Calgary and Greater Toronto.
